Projects

nice-org-html

- Emacs package that generates customizable, responsive, static websites from hyperlinked Org Mode markup files and user-specified Emacs themes, with defaults optimized for code documentation.
- Tools: Emacs Lisp, JavaScript, CSS

Guiser

- Web application partially automating creation and publication of social media content.
- Enables a user to manage multiple personas, create topical content under a given guise with the assistance of large language models, then post that content to associated profiles on various platforms.
- Tools: TypeScript, JavaScript, MERN (MongoDB, Express, React, Node.js), OAuth, LLM APIs

search-factory

- Library of higher-order functions that produce graph-search functions to client specifications.
- Tools: #lang Racket (a Scheme variant)

LifeInteractive

- Java implementation of a novel single-player game based on John Conway's zero-player *Game of Life*.
- Tools: Java 8, Swing

Employment

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| WorkSafeBC Software Developer | RICHMOND, B.C. 09/2022 – pres. |
| Began in a full-stack intern role developing an enterprise Java project based on the Cúram platform. Currently in a primarily back-end role, making REST APIs and event-driven architecture to integrate various .NET microservices with each other and the Java-Cúram project, all running on Azure cloud. | |
| The University of British Columbia Graduate Teaching Assistant | VANCOUVER, B.C. 09/2018 – 04/2021 |
| Planned and facilitated delivery of course materials, organized and led discussion groups and review lectures, communicated with students to identify research interests and address knowledge gaps, and evaluated student performance on assignments, essays and exams. | |
| iSoftStone Canada Search Engine Evaluator | REMOTE 08/2017 – 04/2018 |
| Interpreted query intent, analyzed sponsored search results, researched products and services, and evaluated results for text quality and relevance to query. | |
