## Education

University of British Columbia <b>Bachelor of Computer Science</b>	VANCOUVER, B.C.
University of British Columbia <b>M.A. (Ths.) Philosophy</b>	VANCOUVER, B.C.
University of Lethbridge <b>B.A. (Hon.) Philosophy and Anthropology</b>	LETHBRIDGE, A.B.

## Projects

### M-λ

- Continuation-passing interpreter for extended minimal subset of a call-by-name variation on Scheme.
- Implementation of a reflective untyped lambda calculus, which makes apparent some connections between modal logics, metaprogramming, recursion theory, and continuation handling constructs.
- Tools: #lang Racket (a Scheme variant)

### nice-org-html

- Emacs package that generates customizable static websites from hyperlinked Org Mode markup files and Emacs themes, with defaults optimized for code documentation. Approximately 400 users.
- Tools: Emacs Lisp, JavaScript, CSS

### Guiser

- Web application using generative A.I. to automate creation and publication of social media content.
- Enables a user to manage multiple personas, create topical content under a given guise with the assistance of large language models, then post that content to associated profiles on various platforms.
- Tools: TypeScript, JavaScript, MERN (MongoDB, Express, React, Node.js), OAuth, LLM APIs

### LifeInteractive

- Java implementation of a novel single-player game based on John Conway's zero-player *Game of Life*.
- Tools: Java 8, Swing

## Employment

WorkSafeBC <b>Software Developer</b>	RICHMOND, B.C. 09/2022 – pres.
Began in a full-stack intern role developing an enterprise Java project based on the Cúram platform. Currently in a primarily back-end role, making REST APIs and event-driven architecture to integrate various .NET microservices with each other and the Java-Cúram project, all running on Azure cloud.	
The University of British Columbia <b>Graduate Teaching Assistant</b>	VANCOUVER, B.C. 09/2018 – 04/2021
Planned and facilitated delivery of course materials, organized and led discussion groups and review lectures, communicated with students to identify research interests and address knowledge gaps, and evaluated student performance on assignments, essays and exams.	
iSoftStone Canada <b>Search Engine Evaluator</b>	REMOTE 08/2017 – 04/2018
Interpreted query intent, analyzed sponsored search results, researched products and services, and evaluated results for text quality and relevance to query.	

## Technologies

- Languages: Scheme, Lisp, C, C#, Java, JavaScript, TypeScript, HTML/CSS, UIM (Cúram DSL), SQL,  $\text{\LaTeX}$
- Frameworks and Libraries: Node, Express, React, Mocha, JUnit, Selenium, Cúram, .NET Azure SDK
- Tools: Emacs, IntelliJ, Eclipse, Visual Studio, Git, Linux, MacOS, Windows, Azure DevOps Services
