

Ewan Townshend

 etown.dev

 ewantown

 ewan-townshend

Polyglot developer with experience building and integrating high-volume claims management systems. Comfortable in Java, TypeScript, C#, SQLs and Lisps. Adept at API and system design. Prefers functional and symbolic programming and metaprogramming. Interested in programming language theory, combinatorial problems, and (neuro)symbolic AI.

Employment

- | | |
|--|-------------------|
| Accenture | VANCOUVER, B.C. |
| Software Engineering Specialist | 08/2025 – present |
| <ul style="list-style-type: none">• Consulting role with a focus on designing and building high-volume claims management systems.• Led design and build of APIs, batch jobs, and a telemetry system supporting security audits.• Work primarily on enterprise Java projects based on the Cúram platform. | |
| WorkSafeBC | RICHMOND, B.C. |
| Software Developer | 09/2022 – 07/2025 |
| <ul style="list-style-type: none">• Began as an intern developing an enterprise Java project based on the Cúram platform.• Promoted to full-stack polyglot role building Angular SPAs, REST APIs and event-driven systems. | |
| The University of British Columbia | VANCOUVER, B.C. |
| Graduate Teaching Assistant | 09/2018 – 04/2021 |
| <ul style="list-style-type: none">• Planned and facilitated delivery of course materials for undergraduate courses.• Communicated with students to identify research interests and address knowledge gaps.• Evaluated performance on assignments, essays and exams. | |

Projects

- Meta-λ
- Continuation-passing interpreter for extended minimal subset of a call-by-name variation on Scheme.
 - Implementation of a reflective untyped lambda calculus, which makes apparent some connections between modal logics, metaprogramming, recursion theory, and continuation handling constructs.
 - Tech: #lang Racket (a Scheme variant)
- Guiser
- Web application using generative A.I. to automate creation and publication of social media content.
 - Enables a user to manage multiple personas, create topical content under a given guise with the assistance of large language models, then post that content to associated profiles on various platforms.
 - Tech: TypeScript, JavaScript, MERN (MongoDB, Express, React, Node.js), OAuth, LLM APIs
- search-factory
- Library of higher-order functions that produce graph search functions to client specifications.
 - Provides a unified framework for specifying symbolic A.I. problem-solving strategies.
 - Tech: #lang Racket (a Scheme variant)
- nice-org-html
- Open source Emacs package that generates customizable static websites from hyperlinked Org Mode markup files and Emacs themes, with defaults optimized for code documentation. 600+ users.
 - Tech: Emacs Lisp, JavaScript, CSS
- GNU Emacs (Contributor)
- Upgraded Emacs terminal display to support 24-bit colour on MS Windows 10+.
 - Tech: C, Emacs Lisp, Windows Console API, ANSI escape sequences

Education

- | | |
|--|------------------|
| University of British Columbia | VANCOUVER, B.C. |
| Bachelor of Computer Science | 2021 – 2024 |
| M.A. (Ths.) Philosophy | 2018 – 2021 |
| University of Lethbridge | LETHBRIDGE, A.B. |
| B.A. (Hon.) Philosophy and Anthropology | 2012 – 2017 |

Technologies

Languages: Java, JavaScript, TypeScript, C#, C, Scheme, Lisp, HTML, CSS, UIM (Cúram DSL), SQL, $\LaTeX$
Frameworks/Libraries: Cúram, Node, Express, React, Redux, Angular, NgRx, Selenium, OpenTelemetry
Tools: Emacs, Eclipse, IntelliJ, Visual Studio, Git, Linux, MacOS, Windows, CI/CD on Azure DevOps, GitHub
